

WHAT IS CLAIMED IS:

1. A case for removable hard drive, comprising a main body, a back cover, and more than one hard disk holder; said hard disk holders being configured for connecting and carrying a hard disk each; said main body being a three-dimensional frame, and provided between two lateral sides with a plurality of slide rails, into which said hard disk holders are separately slid to locate thereat; said back cover being provided with a plurality of openings corresponding to said slide rails; and said main body and said back cover being detachably connected together with a fastening structure.
2. The case for removable hard drive as claimed in claim 1, wherein said back cover is a U-shaped member.
3. The case for removable hard drive as claimed in claim 2, wherein said fastening structure comprises locking with screws.

4. The case for removable hard drive as claimed in claim 3, wherein said fastening structure includes mounting holes provided on two sidewalls of said U-shaped back cover, and threaded holes provided on said main body at corresponding positions.
5. The case for removable hard drive as claimed in claim 1, wherein said main body is made of a metal material by way of stamping.
6. The case for removable hard drive as claimed in claim 1, wherein said back cover is made of a metal material by way of stamping.
7. The case for removable hard drive as claimed in claim 1, wherein each of said openings provided on said back cover is adapted for mounting a control circuit board thereto, and said control circuit board having a connecting terminal provided thereon.
8. The case for removable hard drive as claimed in claim 7, wherein electric connections are provided between any two of said control circuit boards that are adjacent to each other.
